

STEP BY STEP

Set Up a Twitch Charity Stream

A quick how-to for supporters.

Steps

1. Plan a stream theme and a fundraising goal.
2. Add a donation link (jadabascomfoundation.org/donate) to your panels and chat commands.
3. Announce the cause at the start and periodically during the stream.
4. Add an on-screen goal tracker if your tools support it.
5. Thank donors live and share a recap afterward.

Tip

Tell viewers exactly what the Foundation does: helps people join the registry and supports patients.
